Note

PWM voltage output dimmable drivers shall be used at frequencies between 250 and 500Hz. In the case of the version without Spots, drivers with higher switching frequency, up to 2Khz, can be used. The profile's length measurement corresponds to the distance between the centers of the suspension joints. To install a profile of length L, the distance between joints coincides with the indicated measurement L, but the profile is a few centimeters smaller.
