The figure is a polar plot representing the angular distribution of a light source. It features a circular grid with radial lines at 10-degree intervals and concentric circles. The vertical axis is labeled with 90°, 60°, and 30° on both the left and right sides. A single lobe is drawn, starting at the center (0°), reaching its maximum value of 906 cd at 90°, and returning to the center at 180°. The label '906 cd' is placed at the bottom center of the plot.
